## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 5-18, drawn to a lock, classified in class 70, subclass 134.
  - II. Claims 19-23, drawn to a method of changing the combination of a lock, classified in class 70, subclass 314.
  - III. Claims 24,25, drawn to a locker lock, classified in class 70, subclass 100.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I,II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a lock for use on structures other than a locker; invention III has separate utility as a method of changing a lock other than a locker lock of invention II or the claimed lock of invention I. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3676

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
